

SPACE: THE FINAL FRONTIER

This month, Puzzled Pint looks at some people, programs, and probes which have been important to space exploration so far. In the end, we hope to offer a glimpse of the eventual destination of our species.

Company headed by Richard Branson; its ultimate goal is to provide sub-orbital spaceflights to the paying public.

Space probe which concluded its mission by plunging into Jupiter's atmosphere on September 21, 2003.

Lander whose final resting place is on the surface of Saturn's moon Titan.

Astronaut whose life was tragically ended alongside Edward White and Roger Chaffee in the Apollo 1 launch pad fire on January 27, 1967.

Program whose final mission was crewed by Eugene Cernan, Ronald Evans, and Harrison Schmitt.

Space probe which had among its secondary objectives, according to Wikipedia, "Map the terminators of Pluto and Charon with high resolution."
