

Dude's Vices

Some of the Dude's favorite vices are White Russians, weed, and bowling.

1. Make a single loop with lines passing through the centers of cells, horizontally or vertically. The loop never crosses itself, branches off, or goes through the same cell twice.
2. Lines must pass through all cells with booze, weed, or bowling balls.
3. Lines passing through booze or a bowling ball must pass straight through its cell, but turn in the cell either before or after or both.
4. Lines passing through weed must make a turn in its cell, but go straight through the cells before and after.
5. Letter cells can go straight or turn (but must obey the above rules if near a booze, weed, or bowling ball).
6. Not all letters are in the path.

Once you complete the loop you will discover another of the Dude's vices.
