

## Nelson

These are *Battleships* puzzles. Various-sized ships (shown beside each puzzle) are hidden on the board. Ships can't touch, not even diagonally. Numbers show how many "boat squares" are in each row or column. After you and your partner have solved your puzzles, in each column find a square that's a "hit" for both of you and write its letter in the blanks between your grids. Thusly find out where this battle took place.
