Puzzled Pint

Illuminati

July 2016

Create two tri-hexaflexagons to discover six sides, each with a unique code.

Instructions to build the hexaflexagons:

1. Cut each one out along the dotted lines. Fold lengthwise.
2. Fold back and forth on all the solid lines. Do this for each of the 10 triangles of the tri-hexaflexagon.
3. Place the folded pattern with the side with "*" facing up and the folded edge away from you.
4. Fold under between 4th and 5th triangles from the left.
5. Fold over on the line between 3rd and 4th triangles from the right..
6. Pull the triangle forward that is behind the triangle that doesn't match the other 5 triangles.
7. Flip over your flexagon. You should see the two "*". Fold so the two are face-to-face and you have a completed hexagon.   Tape together the two triangles that have the "*"
9. Start flexing!
