

viola cyborganista

■■■■■

ELIZA: The viola organista is a musical instrument containing a rotating wheel, which bows the strings that run past it. A cyborg is a person who's had a body part replaced by a machine (or, in this case, a musical instrument).

After stringing up the wheel correctly, put the first letter of each instrument in every diamond crossed by its string. The inner diamonds will tell you what the cyborgs want most, and the outer diamonds will tell you how long they hope they'll last.
