## Answer Sheet

Welcome to Puzzled Pint!

Give us  
Feedback!

### Tonight

- We're here to help! This is not a competitive event. Ask the Game Control volunteers (GC) for hints as often as you'd like. The goal is to have fun, not to be frustrated!
- **If your location is running virtual**, go to the location page (linked on puzzle download page) and find out how to contact your local GC.
- **If you are collaborating online with your teammates (or have no printer)**: There is a Google Sheet this month! Download and make your own copy to collaborate online together. It can be found on the page where you downloaded the puzzles.

### The Puzzles

- Each puzzle will solve to a short word or phrase. How? That's for you to discover.
- Need a code sheet or solving resources? Check out the Resources page on Puzzled Pint's webpage: <http://www.puzzledpint.com/resources/>
- You can use anything to help solve: Use your phone; the internet is fair game! Think your brother might have an insight? Give him a call!
- While each month has a theme, you need no special knowledge of the theme to solve.

### About Puzzled Pint

- How did tonight go? Email us at [Feedback@puzzledpint.com](mailto:Feedback@puzzledpint.com)
- We're an all-volunteer organization.
  - Help us run locally: Talk with Game Control about how you can volunteer.

# THE COLOSSUS OF RHODES

Page 1 of 3

The Colossus of Rhodes was a towering bronze statue of the sun god Helios as tall as the Statue of Liberty. It stood high above the city harbor until it was destroyed by an earthquake only 54 years after it was built.

Many merchant ships are traveling through the harbor, carrying cargo as they sail underneath the spread legs of the Colossus. Determine their names to find an adjective that might describe the Colossus.

- |         |           |                |
|---------|-----------|----------------|
| HUGE    | BEHEMOTH  | LEVIATHAN      |
| HEFTY   | ENORMOUS  | GARGANTUAN     |
| GOLIATH | GIGANTIC  | MONUMENTAL     |
| HULKING | PYTHONIC  | SUPERSIZED     |
| IMMENSE | GINORMOUS | ELEPHANTINE    |
| MAMMOTH | HERCULEAN | BROBDINGNAGIAN |
| MASSIVE | HIMALAYAN |                |
| TITANIC | HUMONGOUS |                |

The appearance of the ships correspond to the letters in their names.  
The blanks below are filled with the letters in G-I-A-N-T in some order.

- |  |                                      |

| All ships with ___'s are west of the Colossus. | All others are east of the Colossus. |
| All ships with ___'s face west.                | All others face east.                |
| All ships with ___'s have two masts.           | All others have one.                 |
| All ships with ___s carry cargo.               | All others carry nothing.            |
| All ships with ___'s have oars.                | All others don't have oars.          |

# THE MAUSOLEUM AT HALICARNASSUS

The Mausoleum at Halicarnassus was a massive elevated tomb built for a Persian king named Mausolus. As you might be able to guess, the word “mausoleum” came from the king’s name — Mausolus is the eponym for the term. Solve the puzzle to reveal something you might find in a mausoleum.

# THE TEMPLE OF ARTEMIS

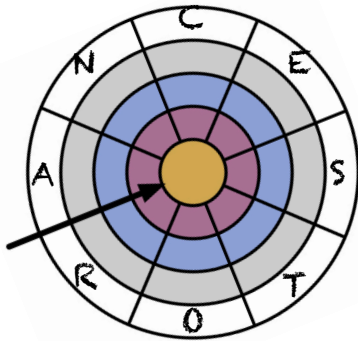

Page 1 of 2

The Temple of Artemis was an illustrious temple at Ephesus dedicated to a distinctly Ionian form of Artemis, the Greek Olympian best known as the goddess of the hunt. Daughter of Zeus and twin of Apollo, Artemis is typically depicted with a golden bow and arrow.

*NOTE: All words start above the arrow and go around clockwise. Clues are shown in order from outer to inner ring.*

Practice your own archery skills to reveal what any good hunter should always be on.

# THE STATUE OF ZEUS

The giant Statue of Zeus, seated in a temple in Olympia (the town that held the Ancient Olympic Games), honored the venerable thunder deity of Greek mythology. Solve the puzzle and **look back** to reveal an apt descriptor for the king of Mount Olympus.

Below is a 15x15 nonogram, a picture logic puzzle. If you don't know how they work, here's a quick tutorial: Each row and column has a certain amount of colored squares that come together to make an image. They're each labeled with clues which indicate groups of colored squares. For example, the first row labeled 8 will only have a contiguous line of eight squares, whereas the first column labeled 2 3 will have a group of two squares and a group of three squares separated by at least one cell. Use a highlighter if you have one!

# THE GREAT PYRAMID OF GIZA

The Great Pyramid of Giza is by far the most famous ancient world wonder — after all, it's the oldest (by about 2,000 years), the largest (just taller than the Lighthouse of Alexandria, and far wider than the Hanging Gardens of Babylon), and the only one left standing.

Over 4,500 years later, the tomb of the pharaoh Khufu remains one of the greatest feats of engineering ever embarked upon by humanity. It has spawned countless conspiracy theories because of its millenia-long intrigue; those theories can get intertwined with the reality of the historical record, so for any self-respecting archeologist, it's important to tell...

# THE HANGING GARDENS

The Hanging Gardens were described as a towering series of terraced gardens with all sorts of flora, but it might not have ever actually existed. It's the only ancient world wonder without a definitive location discovered by historians or archeologists. You could try to find evidence of the Hanging Gardens for yourself, but it's a \_\_\_\_\_.

Below are three sets of terraces, each with eight boxes. Each box will include one letter pair, listed below, which do not repeat. The letter pairs in each set will spell a sequence of seven overlapping four-letter words, clued below. The sequences will first go up the left terraces, then down the right.

The two letter pairs in each of the top terraces will spell a fruit or flower that may have grown in the Hanging Gardens. Each completed puzzle will form a new, unclued word in the bottom terrace. Arrange each bottom word in alphabetical order to discover the answer.

Example: This puzzle spells LOCO, CODE, DELI, LIME, MEGA, GATE, and TEST, first ascending up the left, then descending down the right. The word in the top terrace, LIME, is a fruit or flower that could've grown in the Hanging Gardens. The complete puzzle spells a new word in the bottom terrace, LOST.
