STEP 1: pair flags from each circle by continent, then read off semaphore letters. Use continent numbers from globe for ordering.

North America:
Canada, USA = $\mathbf{M}$

## South America: <br> Guyana, Argentina $=\mathbf{O}$

Europe:
Sweden, Czech
Republic = W

Africa:
Egypt, Angola = $\mathbf{N}$

STEP 2: use previous instructions (MOV EDOWN) to shift nautical signal flag letters down the alphabet. Again, use continents and semaphore pairs for ordering (proceed clockwise starting at 12 o clock/ North), but ALSO use continent numbers for shift amount!

| LETTER | $\mathbf{+ 1}$ | $+\mathbf{2}$ | +3 | +4 |  |
